LOADING SPOUT AND POSITIONER

SIZE: 20" (508 mm)

HANDLING: Cement

LOCATION: Cement Plant
Midwestern United States

FEATURES: Vortex offers two different sizes of Telescoping Loading Spouts for truck loading. Model 25 features a load rate capacity of 250 – CFM. Model 40 (shown in photos) features a load rate of 400 – CFM.

APPLICATION: When combined with a Vortex Dual-Axis Positioner, truck drivers no longer need to waste precious time to reposition themselves directly below the spout prior for loading. The Positioner allows the spout to traverse front-to-back and side-to-side for perfect vertical flow loading of material.

REF #: V148371
